DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - a. Using a digital camera to capture images generated by the projector at constant input levels, each captured image having a dimmest point; generating from the captured images a projector correction plane for each of at least some of the input levels, each projector correction plane configured to attenuate input image data to match the dimmest point as captured by the camera for the respective input level (claim 1);
 - b. A projector has a dimmest point for each input level, and the luminance non-uniformity correction engine attenuates the input level data to match the dimmest point (claim 14); each in combination as claimed cannot be made inherent or obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Minoura (US Patent Number 5,483,229) discloses an image displaying apparatus with image displaying function.

Shiota et al. (US Patent Number 5,838,396) teaches a projection type image display apparatus with circuit for correcting luminance nonuniformity.

Iwamoto et al. (US Patent Number 6,664,973 B1) shows an image processing apparatus, method for processing and image and computer-readable recording medium for causing a computer to process images.
